The Honourable Ambassador of the United States of America'

877 Pretorius Street

Arcadia

Pretoria

Republic of South Africa

Hand delivery to the Honourable or his or her designated

Dear Sir or Madam

In your capacity as the ambassador of the glorious United States of America and on behalf of the Honourable President, his excellency Donald J Trump.

During the past year, our party and the civil rights movement Black Monday have been formally agitating against the brutal and senseless slaughter of farmers, ethnic Boer and Afrikaners as well as other minorities. We formally put the government of the Republic of South Africa on terms as per

the petition here below. As yet, we have not received a single word in response from the government.

We have also demanded formally our right to self determination as per notice and declaration here below. We have not received a single word in response from the government either.

Black Monday Movement has also made the declaration here below as statement of intent relating to the causes outlined here above.

We now petition the President and the government of the United States of America formally to intervene on our behalf. The government of South Africa has become a party to murder and genocide in its refusal to accept our lawful demands for protection as a minority.

We furthermore petition the President and the Government of the United States of America formally to recognise our rightful claim for self-determination. We fully intent to pursue this right to free ourselves and to protect ourselves in the process. We pursue this under International Law, as well as Section 235 of the Constitution of the Republic of South Africa, Act 108 of 1996. There is also an accord between the ANC and certain leaders of the erstwhile Afrikaner People's Front.

We plead as a minority people the grace and the support of the American People.

Yours truly

The Leadership of the National Conservative Party and the Black Monday Movement

Signed on this day 20 October 2018 at Pretoria

“Petition

Herewith the undersigned, as members of the National Conservative Party, as supporters of the objectives of the petition or as general public with an interest in the objectives of the petition:

1. We demand that the South African government acts without delay to mobilise its security apparatus and its security forces to protect its citizens from what has by now become commonly known as "farm murders". The government is duty bound to protect its citizens.
2. We demand that the South African government acts without delay to protect all its citizens, including those of minority ethnic groups, from murder, incitement to murder and incitement and acts of genocide. The government is bound by the South African Constitution and also by International Law to do the same.
3. Furthermore we urge the South African government to declare any crimes committed against the farming community as "priority crimes" and to establish specialist investigation and prosecution units to deal with these crimes on a highest priority.
4. We also warn the South African government that if they ignore or refuse our lawful and fair demands stated above, then we shall take it that they condone or encourage farm murders, genocide and ethnic cleansing of minority groups.
5. Furthermore National Conservative Party shall see that as government failing in its legal duty to protect its citizens and upon mandate we will start to institute legal steps based on criminal, civil and international law against the state president, the ministers concerned in the safety and security cluster, the high command of SAPS and the National Defence Force in their official and personal capacities.

Delivery to:

Ambassadors

High Commissioner

Ministers of Government

Designated official from SAPS

Designated officer from the National Defence Force

We call on all foreign embassies or foreign missions on South African soil to have an official designated and made available on 30 July 2018 at 12:00 noon to take into its possession official copies of our petition.”

“SELF-DETERMINATION AREA FOR THE AFRIKANER/BOER NATION IN THE REPUBLIC OF SOUTH AFRICA

Herewith the official release of the suggested map of the area in which the Afrikaner/Boer people and those of European Descent affiliating them to the Afrikaner/Boer people, will enforce our Right to Self Determination, in terms of the Constitution of the Republic of South Africa and International Law. Our intent is to establish Sovereign self-determination for our people through any and all legal, political, economic and social ways and through a peaceful process in which we accommodate all other peoples and nations that may be affected.

The map below is the product of the hard work of the gentleman and ladies of the Areas Committee of the Afrikaner Strategic Commission, the ASK. This body is an umbrella body that is inclusive of all the self-determination, conservative and volkseie organisations and parties in South Africa. National Conservative Party is a member and as political party we are uniquely positioned in this fold of patriots that is working towards Afrikaner/Boer freedom. Our great debt of gratitude to them and especially to Colonel Franz Jooste, the leader of the Fatherland’s Alliance/Vaderlandsalliansie, who not only chaired the Areas Committee, but was who was intensively involved in the drafting of the map and the actual investigations and research to back the map up as a viable and sustainable option for us to implement.

We must be clear that the map, as it stands now, is a blue print for our claim of rights. It is possible that the final area will differ in size and scope, including areas not included now and in the same way, excluding areas where no mandate for freedom exist. The next phases of the ASK programmes will impact that. As an example, the Northern Transvaal and West Coast are areas that has seen a strong resurgence in fervour for freedom.

The area demarcated complies with all standards and principles for the establishment of a state. It is the area in South Africa where the vast percentage of the Afrikaner/Boer population already resides and are economical active. In numbers, it is also an area where the Afrikaner/Boer enjoys a numerical majority if the vast concentrations in Pretoria, Areas around Johannesburg, Bloemfontein, the South Coast towns and cities and the suburbs of Cape Town is calculated in. The area is encompassed in one single block with defensible borders. It is economically strong and fiscally sustainable.

The area also includes the areas on which the Afrikaner, and later Boerevolk, the Boer nation, has by far, the strongest historic and territorial claims. The areas mostly encompass areas that were virgin land that we as a nation occupied before any other nations, bought from others, received as gifts from others, established states and republics on and for which we fought hostile conflicts and wars. The map has been drawn specifically as not to include tribal lands of other nations or those lands that could form the basis of legitimate efforts of secession of others. The Western, Southern and parts of the Northern Cape has been Afrikaner lands for centuries. As we do not intent to go into hostilities with our future neighbour states, we will follow peaceful routes in settling any disputes we may have with others though.

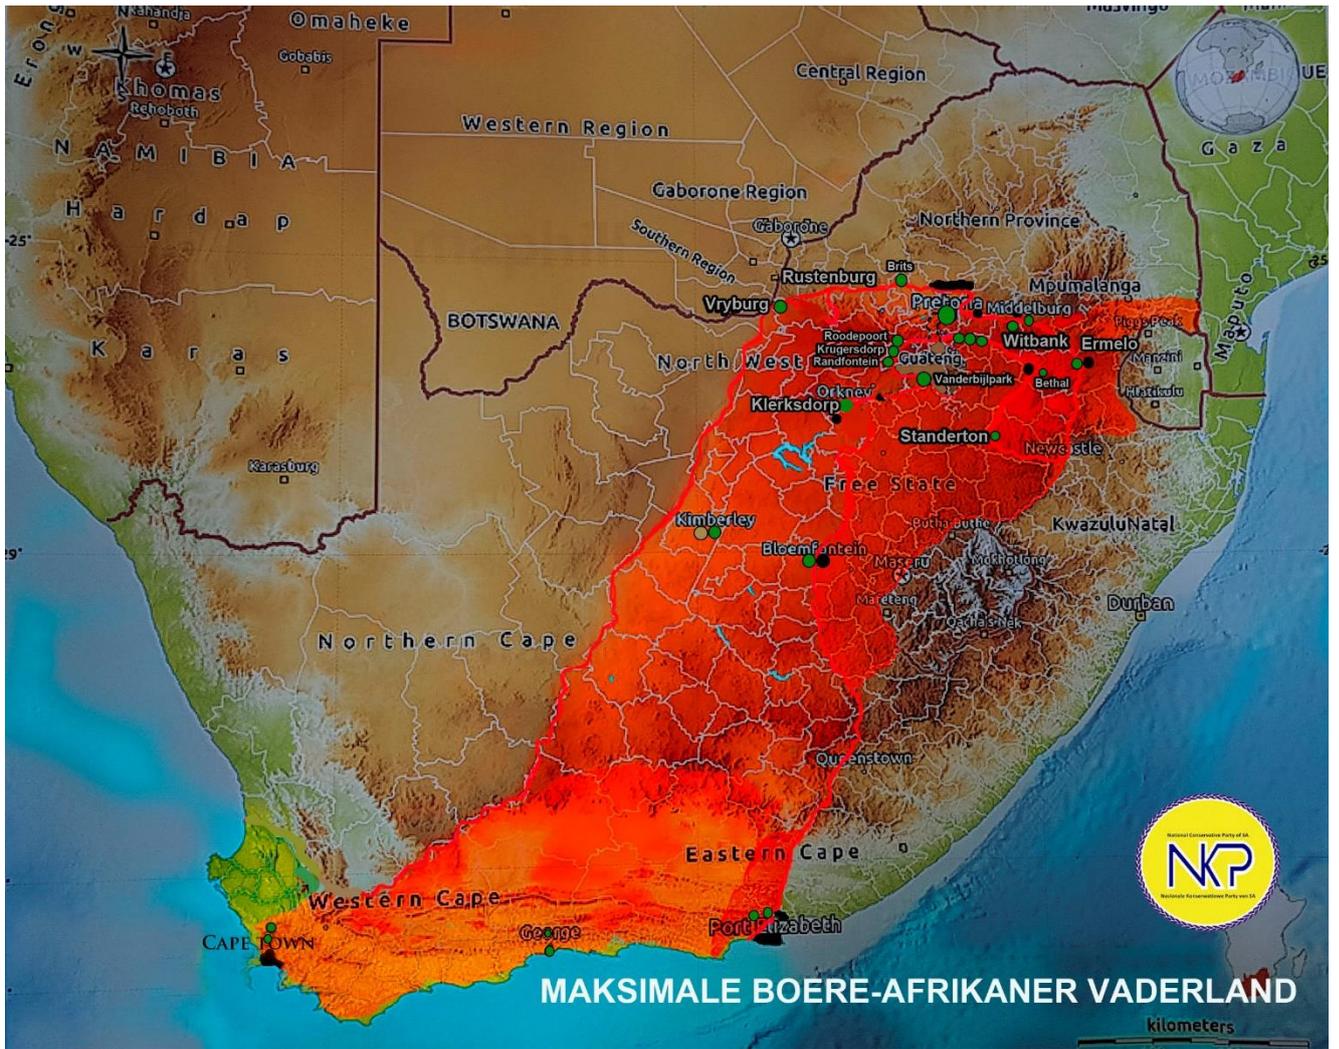

The map shows there for a viable and sustainable Boer State that can be rightfully enforced through a territorial claim to secession.

The drive for self-determination is a hybrid process of law and politics. NKP, as a registered party, is unique in that we can deliver on both. We therefore call on the civil rights bodies and societies to support our, and our partner organisations, in our drive for a mandate at the election polls in 2019.

Prepared by Schalk vd Merwe

National Chairperson NKP

On behalf of our Leadership, members and supporters”

“BLACK MONDAY SOUTH AFRICA.

THE CAUSE

Black Monday’s campaigns are mainly focused on uniting people who also feel “enough is enough”. It is driven by educating citizens on their rights and what legal actions there are available to us.

The ethnic cleansing of the White South African minority - mainly focused on and specifically on our farmers, which resulted in the birth of Black Monday. And how the STOP FARM MURDERS movement came to life.

Food security is one of the first structures which are being attacked by the socialism movement, to overpower our country. Our farmers are guilty of only working hard, producing and taking care of our citizens. Our country is absolutely dependent on our farmers producing food and other consumables both for personal use and export.

Consequently, the Black Monday movement rose to help defend our farmers – against the terrorist war launched, to attack the innocent care takers of South Africa. Our farmers.

Black Monday is driven by building networks to work toward greater safety for law abiding citizens by creating structured networks to inform our people of danger and also creating reaction units in case of attacks.

By enlightening our citizens of the right to renounce the current situation. For taking care or being held responsible for the outcome of other ethnic groups, who have made poor choices in leadership, which has been forced upon us. Resulting in the current state and poverty, a most South Africans find them in.

The Black Monday movement feel obligated to illuminate the mismanagement, of cultural groups, choosing communism and then blaming capitalism, constitutionalism and civilization.

Highlighting the looting incited by government, namely the ANC and backed by the EFF, BLF and other partners.

This socialist movement rejecting the moral and ethical codes of the constitution on which our prosperity is built on. LAND EXPROPRIATION is a very good example of how socialism is working relentlessly to legalize theft. This is part of the main defence movement of Black Monday.

The main drive of the Black Monday movement is directed to the renouncement of that responsibility imposed on us and other minority ethnic groups being held responsible for the poor outcome of the black people in South Africa, who by their vote is the main underlining cause of the current situation.

As well as the disowning of all rights to further accommodate and carry the responsibility of their poor choices in leadership, thus pushing and enforcing the rights of ethnic groups to claim their right for self-determination.

Black Monday is a movement which subscribes to freedom, safety, peace, civilization, law and order as well as progress and economic freedom for all ethnic groups under their own leadership. We welcome ALL ethnic groups supporting "the stop of the ethnic cleansing" of minority groups in South Africa, for example: our farmers.

PLANNED CAMPAIGNS DRIVING THIS CAUSE

1. ENOUGH.
2. THE RISE OF A NATION.
3. OPERATION ANTI-DOTE.
4. FREEDOM IN OUR LIFETIME.
5. SELF-DETERMINATION.
6. IDENTITY.

THE "ENOUGH" CAMPAIGN.

The enough campaign has given background information of what is going on in South-Africa and an introduction to the foundation of the Black Monday movement.

Now in essence the "ENOUGH" campaign is dealing with all the symptoms of what groups like the ANC, EFF, BLF and others are inciting.

In other words, the incitement of racism, intimidation, violence, corruption, theft, abuse, human trafficking, economic genocide, murder, torturing and rapes, as well as the ethnic cleansing of minority groups.

The objective of Black Monday South Africa is to expose the root of the problem and not just administer the symptoms. The root being the SOCIALIST AND COMMUNIST OVERPOWERING OF THE CITIZENS OF SOUTH AFRICA, by means of the inciting of these socialist movements which we are facing as we speak. Thus, this OVERPOWERING is the root cause of what drives the campaigns of Black Monday.

For 29 October 2018 Black Monday is driving a campaign, too unite all ethnic groups, in order to enforce our freedom!

“THE RISE OF A NATION!” CAMPAIGN 29 OCTOBER 2018

"The rise of a nation" campaign signifies the unity of ALL PEOPLE in South Africa, rising to enforce their freedom.

FREEDOM signifying: SAFETY, PEACE, CIVILIZATION, LAW and ORDER. And the INDEPENDENCE OF ECONOMIC GROWTH AND PROSPERITY – to enforce the right to sustain and take care of our own people, which we will never be able to have or do under socialism.

Freedom from genocide, economic genocide, crime, murder, rape, torture and all other symptoms that socialist hate inciting movements are causing. Freedom from ethnic cleansing which are popular with socialist movements and societies.

The encouragement of cultural identity groups to take responsibility for their own well-being through self-determination which is available to claim by all ethnic groups!

The current campaign Black Monday is driving at is...

1. The rise of a nation. (STOP FARM MURDERS, STOP LAND EXPROPRIATION)
2. Bringing to justice the leadership of parties who are calling for genocide.
3. The “education and enforcement of our rights”.
4. Revoking of the forced obligation of being held responsible for people choosing socialism and blaming constitutionalism and civilization.
5. Divorcing the corrupt socialist state and partners.
6. Claiming self-determination.
7. Moving forward to govern of ourselves.

The National Leadership of the Black Monday Movement”
